

A NOVEL MULTI-COMPONENT GARLIC FOOD SUPPLEMENT

Abstract of the Disclosure

This unique garlic food supplement product contains a synergistic combination of natural food ingredients giving a garlic effectiveness greater than provided by the presently commercially available garlic products including tablets, capsules, oils, powders, liquids and extracts.

This unique combination of powdered garlic, neutralized vinegar, olive oil, and honey may be prepared as a tablet, capsule, powder, oil, or semi-liquid, depending on the ratios of individual components. The neutralized vinegar combined with garlic is synergistic for increasing the effectiveness of garlic for safe weight reduction. In addition, the product is believed to give a significant lowering of blood pressure and assisting the body in the alleviation of inflammation of joints and of numerous other disorders which have been reported for garlic itself. The use of sugars (sucrose, glucose, and fructose), e.g. from honey, gives a longer shelf-life and a satisfactory masking of the strong garlic flavor and odor.
